Educational Software that Works.

As teachers we have found the computer to be an effective instructional tool. It can help students learn, discover and understand. It can stimulate them, motivate them and encourage them. Most of all, it can help them achieve success as they learn.

But the computer needs quality educational software to achieve these results.

That's what Davidson is all about. Educational software is our speciality. Quality is our priority.

Our programs take a "back to basics" approach, focusing on specific educational objectives. Each program offers a variety of fun-filled activities to reinforce learning. And, we don't just skim the surface of a subject; we cover it in depth.

Davidson software works because it is educationally sound, it makes learning fun, and students feel successful when they learn. We know. We tested it in classrooms with children like yours.

We're not the only ones who recognize that Davidson software works. Our programs have received awards from Parents' Choice, Classroom Computer Learning, Learning Magazine, Software Retailing, Softsel and BusinessWeek. And all our programs have been "Teacher Certified" by the National Education Association.

Davidson.

We get lots of letters from parents, teachers and students who use and love our software. And we wouldn't be at all surprised if the next testimonial we receive is from you!

MATH BLASTER!™
It makes learning math a blast!

Blast away monotonous drill! Mastering basic math facts is fun with Math Blaster!

Four different learning activities cover more than 600 math facts in addition, subtraction, multiplication, division, fractions, decimals and percents. Math Blaster's eye-catching graphics, animation, bright colors and sound effects all add up to fun. Children's interest will really skyrocket when they play Math Blaster's action-packed arcade game.

With Math Blaster, learning never stops. It comes with an easy-to-use editor so that parents and teachers can add more problems.

Give your children a blast of learning with Math Blaster!

1st through 6th grades, Apple,™ IBM,™ Commodore 64,™ $49.95 suggested retail price.

SPELL IT!™
It's spell-binding!

Spelling doesn't have to be boring. Now there's something that spells "excitement"—Spell It!

This educational program teaches 1000 of the most commonly misspelled words and the spelling rules that go with them. Four different activities with vivid graphics, animation and sound effects make spelling exciting. In a captivating arcade game, students leap at the chance to "feed" correctly spelled words to the Spell It frog.

Spell It also comes with an editor so that you can add your own spelling words.

Cast a spell on the spelling demons with Spell It!

For ages 10 to adult, Apple,™ IBM,™ Commodore 64,™ $49.95 suggested retail price.

SPEED READER II™
Fast help for slow readers!

Anyone who wants to double...triple...even quadruple reading speed should become fast friends with Speed Reader II.

This computerized reading improvement program was designed by reading specialists to increase speed and improve comprehension. Six challenging reading activities will help you replace poor habits with good ones. Chart your progress as you improve using thirty-five reading selections and comprehension tests.

To keep up your momentum, Speed Reader II comes with an editor so you can easily add more reading material. Additional data disks are available for upper elementary, intermediate, high school and college/adult levels.

So, hurry and get Speed Reader II. In no time at all you'll be the winner!

High school/college/adult, Apple,™ IBM,™ Commodore 64,™ $69.95 suggested retail price.

AND

WORD ATTACK!™
It has a way with words!

Vocabulary building used to mean memorizing long lists of words and definitions. Not any more—with Word Attack, learning new words is fun!

Students can master 675 new words, their meanings and usages with four motivating learning activities. And Word Attack's fast-action arcade game reinforces learning.

Even after all the words have been mastered, you still haven't heard the last word from Word Attack. It comes with an editor so you can easily add your own words. Additional data disks are available which contain new words for specific grade levels, including S.A.T. words.

With Word Attack, students will never be at a loss for words or fun!

4th through 12th grades, Apple,™ IBM,™ Commodore 64,™ $49.95 suggested retail price.

CLASSMATE™

It's the teacher's assistant you've always wanted!

Imagine an assistant who will keep track of all your records so you'll have more time for your students! That's exactly what Linda and Sid Broudy created when they developed Classmate.

Teachers themselves, the Broudys are all too familiar with the piles of paperwork you face every day. So, they designed a program to give teachers more time to do what they do best—teach.

Classmate records grades and attendance for classes up to 51 students. It computes final grades based on your weighted averages, graphs distribution curves, prints reports. And that's just the beginning.

If you'd rather be a teacher than a bookkeeper, put Classmate to work in your classroom! You're sure to give it an "A."

For teachers, Apple,™ IBM,™ $49.95 suggested retail price.
